Annual Teaching Plan 2026

Grade 9 · Mathematics · South Africa · Senior Phase

School year: 2026 Terms: 4 Contact time: 4.5 hours a week

About this plan

This plan shows what is taught in each of the four school terms and the task or assessment that goes with it. Teachers follow the order of the topics. A topic may take more than one week. The weeks shown are the teaching weeks of the term, not the calendar weeks.

Content areas

- Numbers and operations: integers, exponents, rational and irrational numbers, ratio and rate, and money.
- Algebra and functions: expressions, equations, patterns and graphs.
- Space and shape: angles, triangles, congruence and Pythagoras.
- Measurement: surface area and volume.
- Data and chance: summarising data and probability.

How to read the tables

Each term has one table. The first column gives the weeks, the second the topic, the third what learners do and learn, and the fourth the task or assessment. Topics marked as belonging to another grade are shown for information only and are not assessed in Grade 9.

> An invented teaching plan for testing a reader. Not copied from any ministry document.

Term 1 · 10 weeks

Weeks	Topic	Content and concepts	Task or assessment
1 to 3	**Integers and exponents**	Adding, subtracting, multiplying and dividing integers. Powers of integers. The laws of exponents. Square roots and cube roots.	Class test on integers.
4 to 5	**Rational and irrational numbers**	Fractions and decimals as rational numbers. Recurring decimals. Why the square root of two is irrational. Estimating roots.	Number line investigation.
6 to 7	**Algebraic expressions**	Terms, coefficients and like terms. Adding and subtracting expressions. Multiplying a term by a bracket.	Worksheet and short quiz.
8 to 10	**Expanding and factorising**	Multiplying two binomials. Taking out a common factor. Difference of two squares. Simplifying fractions with algebra.	Term 1 test (50 marks).

Term 2 · 9 weeks

Weeks	Topic	Content and concepts	Task or assessment
1 to 3	**Linear equations and inequalities**	Solving equations with one unknown. Equations with brackets and fractions. Solving and graphing simple inequalities.	Class test on equations.
4 to 5	**Number patterns and sequences**	Finding the rule of a pattern. The general term of a sequence. Using the rule to find any term.	Pattern investigation.
6 to 9	**Ratio, rate and proportion**	Writing and simplifying ratios. Dividing a quantity in a ratio. Rates such as speed and price per unit. Direct and inverse proportion.	Mid-year examination (80 marks).

Term 3 · 10 weeks

Weeks	Topic	Content and concepts	Task or assessment
1 to 2	**Ratio, rate and proportion**	Continued from Term 2: more problems on rate and proportion, and on sharing in a ratio. Practice for the mid-year examination marks.	Problem-solving worksheet.
3 to 4	**Financial mathematics**	Simple interest and compound interest. Hire purchase. Inflation and exchange rates.	Budget project.
5 to 7	**Functions and graphs**	Input and output tables. The graph of a straight line. Gradient and intercept. Reading values from a graph.	Graph drawing task.
8 to 10	**Lines, angles and triangles**	Angles on a line and at a point. Parallel lines and a transversal. Angles in a triangle. Congruent and similar triangles.	Term 3 test (50 marks).

Term 4 · 8 weeks

Weeks	Topic	Content and concepts	Task or assessment
1 to 2	**Theorem of Pythagoras**	The relationship between the sides of a right-angled triangle. Finding a missing side. Solving problems with right-angled triangles.	Class test.
3 to 4	**Surface area and volume**	Surface area and volume of prisms and cylinders. Changing units of volume. Problems with tanks and boxes.	Practical measuring task.
5	**Trigonometry: sine, cosine and tangent**	Sine, cosine and tangent of an angle. This topic belongs to Grade 10 and is shown for information only. It is not taught or assessed in Grade 9.	No assessment.
6	**Mean, median and mode**	Collecting and organising data. Finding the mean, median and mode. Which one describes a data set best.	Data collection task.
7 to 8	**Probability**	Outcomes and events. Probability as a fraction, decimal or percentage. Comparing what should happen with what did happen in an experiment.	Final examination (100 marks).

Assessment programme and notes

Term	Tasks	Marks
1	One investigation, one test	100
2	One investigation, mid-year examination	130
3	One project, one test	100
4	One practical task, final examination	150

Notes for teachers

- Ratio, rate and proportion is taught over two terms: the start is in Term 2 and the practice is in Term 3.
- Trigonometry (sine, cosine and tangent) is a Grade 10 topic. It appears once in Term 4 for information only.
- Calculators are used from Term 1. Learners show their working in every task.
